

EXTENSION TILT - TFT LCD PLASMA TV BRACKET / BRACKETS

INFORMATION

Designed for your convenience, TV wall brackets can be fitted to make efficient use of space in any room and are the ideal solution to organize your home entertainment systems and to make a visual impact. The main beauty of LCD and Plasma televisions is their slim line design. Specialized wall brackets provide rigid support for the TV and keep it as flat to the wall as possible whilst the bracket remains discreet.

Adjustable mounting brackets are also ideal for flat screen televisions and are suitable for screens that weigh up to 75kg in weight. With adjustable side to side movement and universal fixing positions, these brackets are quick and easy to assemble whilst providing versatility of movement.

All of our brackets include fixtures and fittings and a simple step by step guide for easy installation.
